THE NEXT BEST THING IN ENERGY: How Microgrids are taking over the World

Come and join a world-class group of sustainable energy transition experts and supporters to learn from an international panel about how to boost resilience through islands & remote, military & humanitarian and commercial & industrial microgrids.

Microgrid movement

From this webinar, you will take away a global perspective on microgrids and how they solve issues and serve communities and companies in island & remote, military & humanitarian and commercial & industrial settings.
